graphy of special language research) Orig.de. Special Language Vol 7, No 1-2, 1985. p.82-95

85-458 018-75
International bibliography of multilingual building vocabularies (Title also in French and Russian). Orig. en; fr; ru. New York, NY: United Nations 1983. XXV,277 p. =ECE/H8P/36
The 749 entries give descriptions of the latest editions of bilingual and multilingual vocabularies (i.e. dictionaries, glossaries, lexicons, lists of terms, encyclopedias, etc.) in the field of building and construction. Only works published since 1965 have been included with a few exceptions. All vocabularies were published in ECE member countries by international organizations co-operating with ECE. Terminological sources of standardized terms are not included, as these have already been listed in Int.Bibl.of Standardized Vocabularies, 1979, Infoterm. each item is classed according to the UDC and an own classification system. There are 7 indexes, the last one gives the reference numbers according to the UDC.

Picheloup, D.: Céramique grecque: thésaurus. (Greek ceramics: thesaurus) Orig. fr. Paris, FR: Inst.Natl.des Techniques de la Doc. 1984. xv,95 p. =Promotion XIV
Structured alphabetical list and arrow-diagrams to display the relationships.

85-490 048-99
Richter, J., Institut für Theologie und Frieden: Bibliographie Theologie und Frieden. Bd.1.2: Thesaurus.Register. (Bibliography theology and peace) Orig. de. Köln, DE: VerI.Bachem 1984. 245 p. ISBN 3-7616-0768-7

The first section of the book is a thesaurus of almost 1000 terms including many names of individual concepts. It exists in 3 parts: an alphabetical list with relationships, a systematic part and an alphabetical descriptor list with explanations (scope notes) to each descriptor. The systematic part is also in 3 parts: 1) for combinations of concepts, 2) "concept fields", and 3) concepts with their partition relationship. The second section of the book is an index of the thesaurus terms to a document collection, accessible by numbers.

048.1 GENERAL SCHEMES FOR SPECIAL PURPOSES

85-491 048.1
Zentralinst.für Inform.und Dokum.der DDR (ZIID), Berlin, DD: Informationsrecherchesprachen. Normativ-technische Dokumente und methodische Materialien. (Information retrieval languages. Normative-technical documents and methodical materials. Vol.2) Orig. de. Berlin, DD: ZIID 1983. 68 p.

The publication is in three parts: 1) methodical recommendations for the application of the Rubricator, 2) the Rubricator of the ISWTI, 3) changes of the classes on the second level. The 2nd part is a classification system for science and technology, including also the branches of economics. There are 3 levels, the first comprising some 100 classes. The CS is used in the International System for Scientific and Technical Information of the Comecon Countries.

85-492 048.1
Negrini, G.: Un vocabolario quale strumento ausiliario per il reperimento dell'informazione. (A vocabulary as an auxiliary tool for the retrieval of bibliographic information) Orig. it. Roma, IT: CNR-ISRDS 1984. 77p. = Note bibliogr. e di doc. sci. 45
The vocabulary was derived from the semantic comparison of a natural language and the classes of a very detailed classification scheme (UOC). It is designed for the users of a research library in order to improve their access to literature by their own natural language expressions. The vocabulary is related to the classes of the classification system.

1 THEORETICAL FOUNDATIONS

11 Order and Classification

85-553 111
Maulinya, A.A.: Classifying or systematization (the librarian's point of view. Orig. ru. Nauch.-tekhn.terminol. No 12, 1983. p.13-16, 5 refs.
Discussion on the use of the term 'systematization' instead of classifying which was introduced through a new USSR State Standard. The author doubts the usefulness of this exchange, especially also with respect to international usage.

85-554 111
Ungváry, R.: Ranganathan's classification theory. Orig.hu. Tudom.Musz.Tajek. Vol 31, No 5, 1984. p.161-175, figs., 14 refs. Comments on excerpts from Prolegomena to Library Classification. Priority is given to Ranganathan's classification philosophy, but extracts characterising the essential features of his personality, his novel ideas, peculiar vocabulary and Indian attitudes and views are also included. (Author)

85-555 118-26
Fugmann, R.: Peculiarities of chemical information from a theoretical viewpoint. Orig. en. Chem.Inform.Comput.Sci. Vol 25, 1985. p.174-180, IAD-Schr.1256
Chemistry is exceptional among the sciences in that information in this field is, owing to the structural formulas, extraordinarily clearly and lucidly defined, particularly durable, and intensively used. Exceptionally high demands can and must therefore be made on the accuracy of the information supply in this field, and its indexing and retrieval techniques are correspondingly advanced. (Author, abbr.)

85-562 126
Dmitrevskaya, I.: General scientific notions from the viewpoint of systems approach. Orig.ru. In: Stanovlenie i struktura poznaniya i poznaniya. Ivanovo, SU 1983. p.155-163, 11 refs. The process of general scientific notion formation is described with the help of a systems synthesis model. General scientific notions are highly important for the synthesis of scientific knowledge as they perform systematization functions in the process of sciences integration.

85-563 127
Deshko, A.I., Ignatenko, B.V.: Conceptual level description of a subject field in information systems. Orig.ru. In: Modelir. i informat.v.RAS i OGAS. Kiev, SU 1983. p.38-51, 10 refs. Presentation of a logical-information model for subject field (SF) description on the conceptual level of database design, which provides for the integration of the information needs of the various information system users. SF entities are: things, properties and relations. The notion of 'role' is introduced (of a thing in a relation and a property in a thing's description) and uses this concept to development and substantiate the categorial structure of the SF conceptual model.

85-564 127
Erema-Eremenko, A.A.: The methodological basis of implementation of the subject field description subsystem within a database design system. Orig. ru. In: Modelir. i informat.v RAS i OGAS. Kiev, SU 1983. p.71-76, 4 refs. A conceptual data description (CDD) was developed from source information representing entities, their properties and relationships. Man-machine procedures are given which help to implement the CDD system by performing the functions of definition, analysis, qualification and updating of the source data. The SF description operators are shown which perform in the CDD system the operations of inclusion, definition, deletion, selection, join and separation of entities in question.

16 Development of Science and Classification

85-585 161
Kalinina, V.A.: Towards the definition of the concept "knowledge". Orig. ru. In: Dialekt.-materialist. analiz estestvenno-nauch.znaniya. Moskva, SU 1983. p.114-121, 13 refs. Soviet philosophers regard knowledge as a result of the reflection by a subject of the objective reality. Knowledge is interpreted as a phenomenon of conscience and in the objectivized form as a relatively independent integral system. Besides being a sign system and a system of logical sentences, scientific knowledge may also be considered a system of cognitive images.

85-586 161
Satija, M.P.: On quantifying knowledge. Orig. en. Herald Libr. Sci. Vol 23, No 1-2, 1984. p.23-30, 23 refs. States that difficulties in measuring the quantity of knowledge are built-in. Examines factors such as money spent, number of persons engaged in research, documents published, ideas and bits, as possible units for measuring knowledge. Applies J.J.Rousseau's law of elites to the number of documents to estimate the quantity of knowledge.

85-587 1621
Kuptsov, V.: The structure of scientific knowledge. Orig. ru. Obshchestv.nauki No 3, 1984. p.121-133. Scientific knowledge is seen as a complex system of a hierarchy of structural levels: focal knowledge, scientific field knowledge and knowledge embracing entire sciences.

85-588 1627
Krasnonos, N.A.: Correlation of the principles of the material unity of the world and the unity of knowledge in scientific cognition. Orig. ru. Filos.probl. sovrem. estestvozn., No 56, 1984. p.30-37, 11 refs.

Dykstra, M.: PRECIS. A primer. Orig. en. London, GB: The British Library. Bibliographic Services Div. 1985. 278 p.

ISBN 0-7123-1022-3

The primer is meant as a companion volume to the PRECIS Manual of Concept Analysis and Subject Indexing in order to serve both, the student and beginning indexer with the primer and the teacher with the manual. Chapters deal with the following topics: 1) What is PRECIS?, 2) How PRECIS works, 3) String writing codes and conventions, 4) Differencing, 5) Dependent elements, 6) Coordinate Concepts, 7) - 9) and 11) The primary operators, 10) Special classes of action, 12) PRECIS syntactical aspects: summary chapter, 13) Coding for computer manipulation, 14) Terms and their thesaural relationships, 15) Creating a thesaurus network, 16) Managing PRECIS input and retrieval. Appendices. Index.
